

1. How do you like to custom your CloneBone 100%? And create your own unique character!!

Stick Man gives you very detail body parts that can help you do all the animations with details.

2. Wow! Man! I can turn my character into my own unique robot?!

Of course you can and it's pretty easy to just attach to the body parts with the prop you wish to use.

3. Jaw Bone Animation to sync with CT5!

With jaw bone animations, you can easily sync chin animations with iClone3's CloneBone. There are more controls for you to animation every parts of the body.

4. Wanna see my robot move? Here it is waving to you! Welcome to iClone3!
