NEW CrazyTalk Animator 3.1
Auto-Rig Photoshop Artwork for PSD Character Animation

TURN YOUR PSD DRAWING INTO ANIMATION
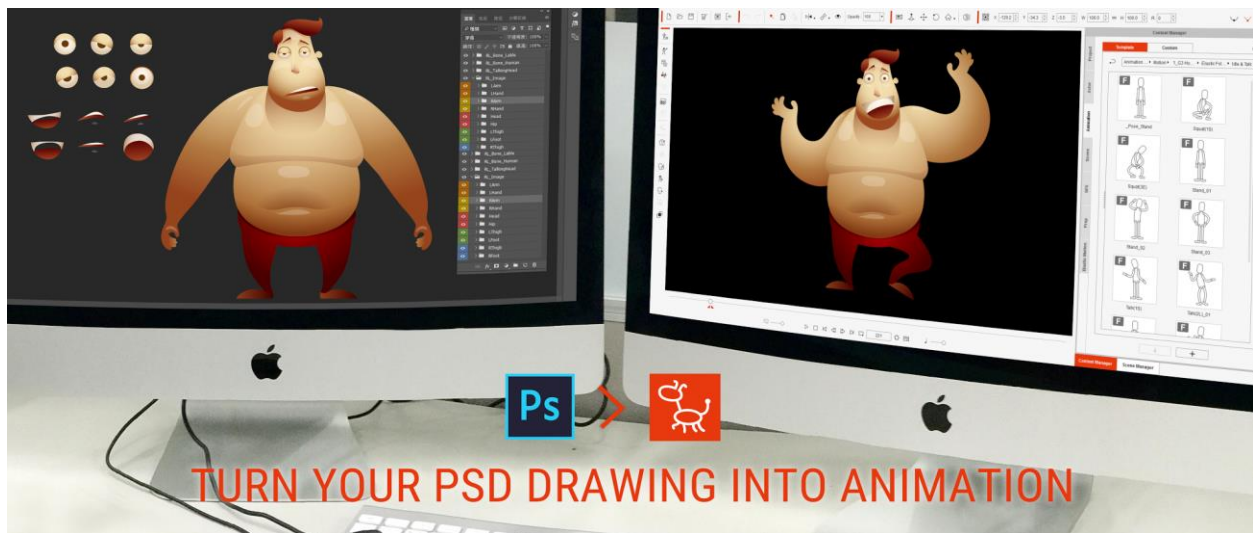

04/24/2017 San Jose, CA - Reallusion updates 2D animation software, CrazyTalk Animator 3.1 with specialized Photoshop templates to easily setup and save PSD character designs as fully auto-rigged CrazyTalk Animator characters. CrazyTalk Animator PSD character animation tools allow any artist to create characters in Photoshop (or PSD layer compatible tools) that can come to life with lip-sync, bone animation and morphing. You can save valuable setup time and quickly animate PSD characters directly from Photoshop using PSD templates designed to make human biped, quadruped, talking heads and more!

Draw your Character   Use PSD Template   Check Bone Structure   Animate it
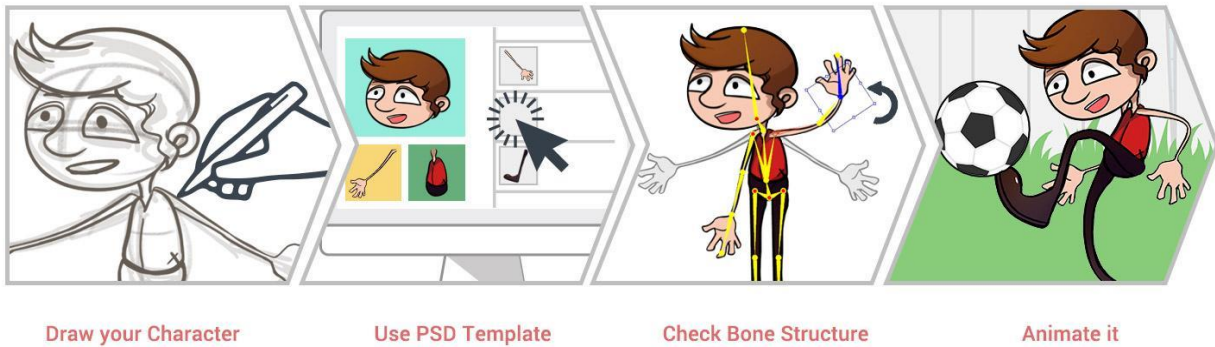

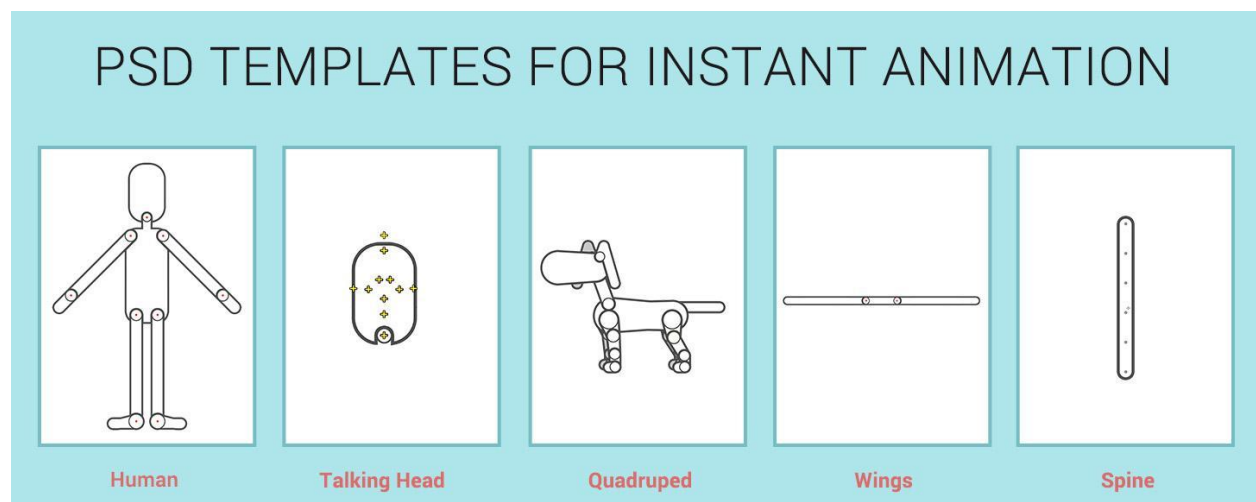

Photoshop PSD Character Animation in 4 Easy Steps

1. **Design** a Character using Photoshop or PSD compatible software
2. **Organize** the PSD template and layers provided by Reallusion to setup the character. Apply body parts layers to the PSD template, and align the joints location
3. **Save** and Import the PSD into CrazyTalk Animator to test, preview and round-trip edit
4. **Animate** PSD characters with CrazyTalk Animator 3.1 motions, poses or facial animation
